PARTH R PATIL

UI/REACT JS DEVELOPER

Passionate Software Developer with knowledge of front end development. I am a fast learner with passion for computer technology.

WORK EXPERIENCE

Software Engineer
Cognizant | December 2020 - Present

- Contributed in developing a Life-Science Application (SHARED INVESTIGATOR PLATFORM) using React JS, CSS, HTML, and JavaScript, which improved user engagement and increased website traffic.
- Optimized the performance of the website using React Router, Hooks, Lazy Loading, Splunk resulting in faster page load times and improved website responsiveness.
- Development of various UI Portals according to the requirement provided by clients.
- Utilized Redux to manage application state, and implemented best practices for scalability and reusability.
- Leveraged Splunk and Kibana to develop front end components and visualizations for monitoring and analyzing website performance metrics, such as page load times and user behavior.
- Development of responsive UI screens for home pages of the website using Bootstrap-5
- Creating Unit Testing Log and other documentation for formal concerns and defects

PERSONAL PROJECTS

Search It - Unsplash :
A search engine website built using React JS is an platform for users to search for, view, and explore different images.
